Jackie Oliver, will be in Red-
man's heat. Jarier, who only
moved into the car yesterday,
was third fastest qualifier. Al
Unser, fifth fastest, also is in
this heat.

Cars with even-numbered
positions (2-4-6 etc.) go into the
second heat and that puts rookie
surprise B. J. Swanson, fourth
quickest, in with Andretti. Oliver,
sixth best in timing, also is in this
heat.

Warwick Brown, the Tasman
series champ from Australia,
bashed up the Jack McCormick
Talon yesterday when he hit a
guardrail, delaying the start of
the Six Hours while repairs were
being made. But his car was re-
paired and he'll be in Redman's
heat.

Formula 5000 heats pay \$1,250
to the winner and the feature pays
\$15,000 to win. So, adding contin-
gency money offered by various
sponsors, it can be a lucrative
afternoon for the winner.

'60's road racing, admits, "We
grit our teeth each time we come
to the track. The record is a trib-
ute to our entire crew."

Hall puts the team's cars to-
gether at his Rattlesnake Race-
way near Midland, Tex., and Red-
man puts them out front on the
race courses.

Redman, who leads the '75 point
race, would like to see two 75-
mile features instead of two short
heats and a 101-mile feature.
"The complaint is fans wouldn't
know immediately who the over-
all winner was (on basis of total
elapsed time). But I think it would
make for better racing than with
10 cars in a heat."

Redman is not a Formula One
enthusiast. "Too much business
and too little fun," he'll tell you.
Now, Formula 5000? That's
something else.

competition.

After both he and Brian Redman
wiped out all existing track rec-
ords here, including the For-
mula One mark set by Carlos
Reutemann last October, Andretti
commented: "I predicted it. How
did I know? Because I know what
my Formula 5000 car can do com-
pared to my Formula One car. Of
course, you're talking about a lot
more horsepower."

And you can be sure that Mario
will be going "all out" today.
After Redman broke his record
in the final minutes of qualifying
Friday, Andretti said, "If I'd
have had more time, I'd sure
as hell been trying to get that
record back."

One Andretti admirer is his
teammate, Al Unser.

"Mario just loves Formula
One," said Unser. "Given a full-
time try at it, I think he can win
the world's championship."
